2009 Highlights

Portable Multifunction Monitor

Mobility is the road to everywhere!

Multi-functional features on a portable unit address the most flexible vital sign monitoring, anywhere, anytime.

Read more on page 21...

Portable Oxi-Capnography

Comprehensive Respiratory Care!

Early prevention from needless mishaps is possible by monitoring respiratory status breath by breath in clinical application.

Read more on page 10...

Wireless Telemetry

Remote disease management in aging society!

This family provides a wireless solution for oxygen saturation data transmission-remotely and globally.

Company's Profile

COMDEK is a professional manufacturer of biomedical industry, which was established in 1985 and strives for the application of photoelectric medical technology to research, develop and produce a series of non-invasive measuring equipment. As a whole, our products cover both diagnostic and homecare two markets.

COMDEK has invested to develop and market the new products of biomedical industry since 1992 carrying out diversify strategy, and successfully combining the hardware and software technology of existing IT industry, as well as integrating high technology regarding photoelectric and medical science. It has presented Pulse Oximeter, Patient Monitor and Home Care series products in 1996 to become the only and the first professional manufacturer having R&D and core technology in Taiwan and obtained national Innovation Research Award, Biotech Research Award and Excellent Award many times.

COMDEK is a manufacturer with ISO 9001, ISO13485 and GMP, marketing own-brand products in more than 60 countries of the world, establishing a good partnership with agents. In the future, it will actively invest more manpower in R & D, and extend core technology to the home care market for prevention medical science and strengthen to establish global planning and management in order to become a main member among the supply chains of global biomedical industry.

MD-600P

Portable Pulse Oximeter

Description

MD-600P is a hand-held unit with large LED display and light-weight for carry. It provides high accuracy and reliable performance for SpO₂ and Pulse Rate measurement. The functions combine adjustable alarm presetting, mute and low battery indicator. It is suitable for the field of hospitals, clinics and homecare application.

Features

- High accuracy
- Light weight and compact design
- Large LED and clear numerical display
- Accurate SpO₂ and Pulse measurement
- Reliable results even with low perfusion
- Adjustable Alarm Range
- Real time display the physiological status
- AC/DC or battery selectable
- Built-in charger

Portable Oximeter

MD-610P

Portable Pulse Oximeter

Description

MD-610P is a hand-held unit with Large LED display and light-weight for carry. It provides high accuracy and reliable performance for SpO₂ and Pulse Rate measurement. It is suitable for the field of hospitals, clinics and homecare application.

Features

- Light weight and compact design
- Large LED and clear numerical display
- Accurate SpO₂ and Pulse measurement
- Real time display the physiological status
- DC only

Refer to page 33 for accessories.

MD-620P

i - Oximeter

Description

MD-620P *i*-oximeter is an up-to-date palm size pulse oximeter with LCD display and backlit function. It provides alarm presetting with time, tone, volume adjustable functions and 48 hours memory. For sleeping diagnostic application with *i*-Smart Link software through USB transmission, a complete solution for Telemedicine configuration is possible.

Features

- Accurate SpO₂ and Pulse measurement
- 48-hour memory capacity
- Large LCD display with backlight
- Adjustable Alarm Range
- Adjustable volume with tone function
- Pocket size-extremely light and easy to carry
- AC/DC or battery selectable
- Link with PC via USB port for data analysis

Refer to page 33, 35 for accessories.

i - Oximeter

MD-620P

Smart *i* - Oximeter

Description

MD-620P Smart *i*-oximeter is an up-to-date portable pulse oximeter with LCD display and backlit. It provides alarm presetting with time, tone, volume adjustable functions and 48 hours memory. Data information can be printed out through Infrared interface. For sleeping diagnostic application with *i*-Smart Link software through USB or Wireless transmission, a complete solution for Telemedicine configuration is possible.

Features

- Wireless transmission
- Infrared Interface
- Accurate SpO₂ and Pulse measurement
- 48-hour memory capacity
- Large LCD display with backlight
- Adjustable Alarm Range
- Adjustable volume with tone function
- Pocket size-extremely light and easy to carry
- Wireless transmission or USB port to PC for data analysis

Refer to page 33, 35 for accessories.

Smart *i* - Oximeter

MD-620P/R1

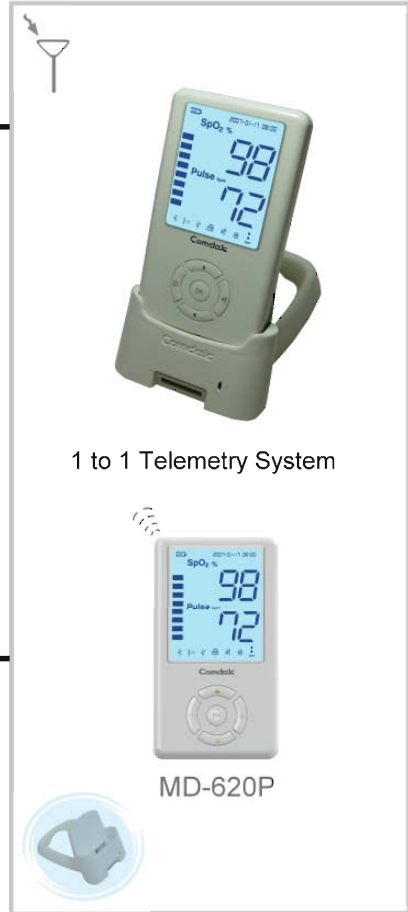

1 to 1 Telemetry System

Description

MD-620P/R1 Telemetry system is a high performance system featured with user-friendly design and simultaneous wireless transmission. This system includes sender and receiver units for remote patient care. It provides the best and trouble free assistance for long-term patient monitoring by wireless technology.

Features

- Accurate and real time SpO₂ & Pulse results
- Wireless transmission
- Infrared Interface
- 48 hours memory capacity
- Accompanying charger stands for audio output
- Wireless transmission or USB port to PC for data analysis and management

Refer to page 33, 35 for accessories.

1 to 1 Telemetry System

MD-620P/T1

Wireless Telemetry System

Description

Inspired with an idea "measurement locally, transmission globally". MD-620P/T1 Wireless Telemetry System is a revolutionary pulse oximeter truly eliminating all space limits and transferring data via mobile units to a server for clinician's in time check. For remote disease management, MD-620P/T1 Wireless Telemetry System is the No. 1 pulse oximeter you associate.

Features

Measurement Locally, Transmission Globally
Wireless connection between patients and clinicians

Communication with mobile units and server
A simple click for data transfer anywhere, anytime

Fancy design on a compact unit

48 hours storage capacity

Reliable SpO₂ technology for air ambulance system

Refer to page 33, 35 for accessories.

MD-630P

Portable Pulse Oximeter with Printer

Description

MD-630P is a multifunction with high accuracy and reliable performance. It provides the alarm pre-setting for high and low SpO₂ and Pulse rates. With its built-in thermal printer and 30 minutes memory capacity, the data can be printed out right away. Safe, fast and convenient make MD-630P become essential equipment in first aid, ICU and prehospital system.

Features

- 30 minutes Memory
- Built-in thermal printer for print-out
- 50 Records of Recall Memory
- Adjustable Alarm Range
- AC/DC or battery selectable
- Low Power Consumption

Refer to page 33 for accessories.

MD-630P Plus

Portable Pulse Oximeter with Printer

Description

The new enhanced model, MD-630P Plus Handheld Pulse Oximeter, can print out the immediate report or apply to our Smart Link application software for Sleeping Diagnostics Analysis. The effective data reading and records will benefit for the patients and users of SpO₂ & Pulse data collection and management. This advanced unit is perfectly applicable for hospitals, clinical surgery, first aids, ICUs, and personal home-care market.

Features

- 36-hour & 24-hour Memory selectable
- Built-in thermal printer for print-out up to 240 records
- 100 Records of Recall Memory
- Print Report Selectable
- Adjustable Alarm Range
- AC/DC or battery selectable
- Low Power Consumption
- Link with PC via USB port for data analysis

Portable Oximeter

MD-650P II

Traveler Oximeter

Description

The new second generation of MD-650P, traveler oximeter, is smaller, lighter, and further more suitable for spot-checking with its all-in-one design. Its large LED display with clear pulse strength signal allows users to read the results easily and accurately.

Features

- High accuracy even with low perfusion
- Suitable for any patient from pediatric to adult
- All in one with built-in finger probe
- Easy carry for spot-checking
- Pulse strength by full scale light bar indicator
- Large and Light LED indicator
- Easy to read for any time and any where
- Low power consumption
- Auto power off when not in use

Traveler Oximeter

MD-660P

Portable-Oxi-Capnography

Description

MD-660P Portable Oxi-Capnography displays four values of EtCO₂, Respiration, SpO₂ and Pulse Rate, as well as CO₂ capnographic and SpO₂ waveforms. Trending on screen can review the records the waveform changes for analysis. Through the optional software of Smart Link V and USB connection to a computer, patient data can be searched and analyzed. (Vet version and Capnography available upon request)

Features

- Measurement on SpO₂, Pulse, EtCO₂, and Respiration
- Real time SpO₂ and EtCO₂ waveform display
- 72-hour memory capacity
- Trending on screen
- Adjustable Alarm Range
- Light weight and compact design
- Light and large LCD display
- Built-in charger
- Link with PC via USB port for data analysis

Refer to page 33, 35 for accessories.

MD-660P II

Portable Capnography

Description

MD-660P II Portable Capnography displays the values of EtCO₂ and Respiration, as well as CO₂ capnographic at the same time. Trending on screen can review the records the waveform changes for analysis. Through the optional software of Smart Link V and USB connection to a computer, it can search and analyze all of patients' data with 72 hours memory.

Features

- Measurement on EtCO₂, and Respiration
- Real time EtCO₂ waveform display
- 72-hour memory capacity
- Trending on screen
- Adjustable Alarm Range
- Light weight and compact design
- Light and large LCD display
- Built-in charger
- Link with PC via USB port for data analysis

Portable Capnography

MD-670P

Portable Pulse Oximeter with Waveform

Description

MD-670P is a portable pulse oximeter with real time SpO₂ waveform on screen for instant diagnosis and 72 hour memory capacity for data management. Trending on screen can review the records the waveform changes for analysis. This unit is perfectly applicable for hospitals, clinical surgery, first aids, ICU, and prehospital system.

Features

- Accurate SpO₂ and Pulse measurement
- Real time SpO₂ waveform display
- Light weight and compact design
- Large LCD display with backlight
- Adjustable Alarm Range
- Tone function to indicate SpO₂ difference
- 72-hours memory capacity
- Trending on screen
- AC/DC or battery selectable
- Link with PC via USB port for data analysis
- Built-in charger

Refer to page 33 for accessories.

Portable Oximeter

MD-670P Plus

Portable Oxi-EKG

Description

The MD-670 plus is one-channel, 3-lead portable EKG monitor, which can display the measurement results of SpO2 and Pulse, as well as the waveform of SpO2 values and EKG trace. Trending on screen can review the records the waveform changes for analysis. Through the optional software of Smart Link I and USB connection to a computer, it can search and analyze all of patients' data up to 72 hours memory.

Features

- Large LCD display
- Real time SpO2 and EKG waveform display
- Measurement for SpO2, Pulse Rate and EKG
- Trending on screen
- Sampling interval selectable
- 72-hour memory capacity
- Real time display the physiological status
- Link with PC via USB port for data analysis
- Built-in charger

Refer to page 33, 34 for accessories.

Portable Oxi-EKG

MD-680P

Palm Pulse Oximeter

Description

MD-680P, a palm-size unit with ergonomic and all-in-one design, is easy carried for spot-checking. It presents an optimal performance with easy operation. Furthermore, the clear LED digital display with audio function brings you an outstanding observation. Those unique and excellent features make MD-680P become the most necessary and important device in clinical, ambulance and homecare application.

Features

- High accuracy even with low perfusion
- Quick measurement response
- Large and light LED display
- Clear light bar indicating pulse strength
- Low power consumption
- Auto power off

MD-700

Desktop Pulse Oximeter

Description

MD-700, a desktop oximeter, features a large LED display and alarm presetting for patients' safety. Through the optional software of Smart Link I and USB connection to a computer, it can search and analyze all of patients' data up to 72 hours memory.

Features

- Large LED display
- Accurate SpO₂ and Pulse measurement
- 72-hour memory capacity
- Real time display the physiological status
- AC/DC or battery selectable
- Link with PC via USB port for data analysis
- Built-in charger

Refer to page 33 for accessories.

Patient Monitor

MD-710

Desktop Pulse Oximeter with Waveform

Description

MD-710 is a desktop pulse oximeter with real time SpO₂ waveform on screen for instant diagnosis and up to 200 hour memory capacity for data management. Trending on screen can review the records the waveform changes for analysis. This unit is perfectly applicable for hospitals, clinical surgery, first aids, ICU.

Features

- Accurate SpO₂ and Pulse measurement
- Large LCD with SpO₂ Waveform display
- Trending on screen
- Sampling interval selectable
- 200-hour memory capacity
- Real time display the physiological status
- Link with PC via USB port for data analysis

Refer to page 33 for accessories.

Patient Monitor

MD-720

NIBP Monitor

Description

The MD-720 is a portable and desktop selectable NIBP monitor, which can display the measurement results of SpO₂, Pulse, Systolic, Diastolic and MAP, as well as the waveform of SpO₂ values. Trending on screen can review the records the waveform changes for analysis. Through the optional software of Smart Link II and USB connection to a computer, it can search and analyze all of patients' data up to 200 hours memory.

Features

- Large LCD with SpO₂ Waveform display
- Measurement for SpO₂, Pulse Rate, Systolic, Diastolic and MAP
- Trending on screen
- Sampling interval selectable
- 200-hour memory capacity
- Real time display the physiological status
- Link with PC via USB port for data analysis

Refer to page 33, 34 for accessories.

Patient Monitor

MD-730

EKG Patient Monitor

Description

The MD-730 is a one-channel, 3-lead EKG patient monitor, which can display the measurement results of SpO₂ and Pulse, as well as the waveform of SpO₂ values and EKG trace. Trending on screen can review the records the waveform changes for analysis. Through the optional software of Smart Link III and USB connection to a computer, it can search and analyze all of patients' data up to 200 hours memory.

Features

- Large LCD display
- Real time SpO₂ and EKG waveform display
- Measurement for SpO₂, Pulse Rate and EKG
- Trending on screen
- Sampling interval selectable
- 200-hour memory capacity
- Real time display the physiological status
- Link with PC via USB port for data analysis

Refer to page 33, 34 for accessories.

MD-750

Oxi-Capnography

Description

MD-750 Oxi-Capnography displays four values of EtCO₂, Respiration, SpO₂ and Pulse Rate, as well as CO₂ capnographic and SpO₂ waveforms at the same time. Trending on screen can review the records the waveform changes for analysis. Through the optional software of Smart Link V and USB connection to a computer, patient data can be searched and analyzed. (Vet version and Portable Capnography available upon request)

Features

- Large LCD display
- Real time SpO₂ and EtCO₂ waveform display
- Measurement for SpO₂, Pulse Rate, EtCO₂, and Respiration
- Trending on screen
- Sampling interval selectable
- 200-hour memory capacity
- Real time display the physiological status
- Link with PC via USB port for data analysis

Refer to page 33, 35 for accessories.

Oxi-Capnography

MD-760

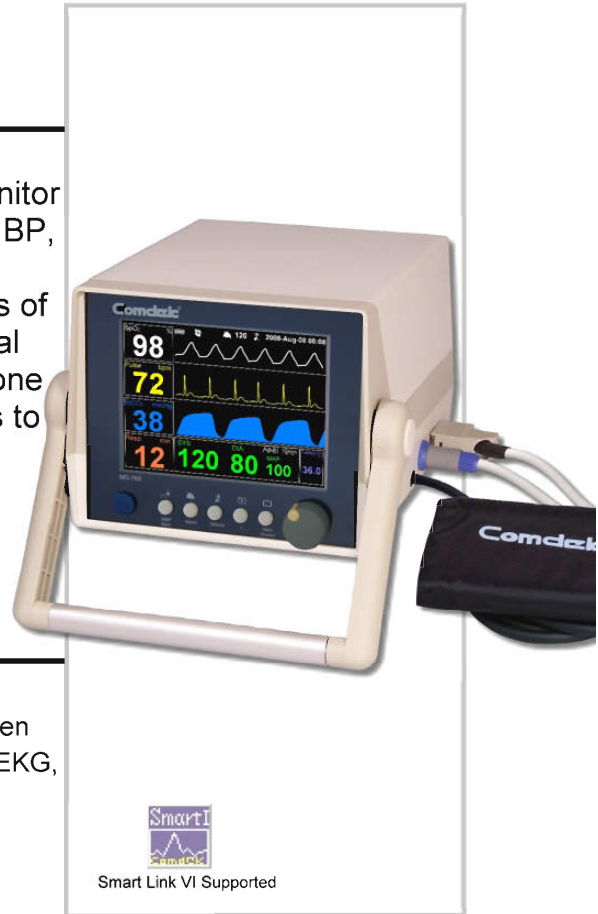

Multifunction Patient Monitor

Description

MD-760 is a desktop and portable selectable multifunction patient monitor with parameters of SpO₂, Pulse, NIBP, EKG, EtCO₂, Respiration and Temperature, as well as waveforms of SpO₂, EKG and EtCO₂. All essential vital signs are available with all-in-one unit. TFT color display allows users to distinguish different parameters clearly. Customer-made service is available upon request.

Features

- 5.7" color TFT LCD display
- SpO₂, EKG and EtCO₂ Waveform on screen
- Parameter selectable: SpO₂, Pulse Rate, EKG, EtCO₂ Respiration, and temperature
- Trending on screen
- 200-hour memory capacity
- Real time display the physiological status
- Link with PC via USB port or Bluetooth for data analysis

Refer to page 33, 34 for accessories.

MD-800

Portable Multifunction Monitor

Description

MD-800 is a desktop and portable selectable multifunction patient monitor with parameters of SpO₂, Pulse, NIBP, EKG, EtCO₂, Respiration and Temperature, as well as waveforms of SpO₂, EKG and EtCO₂. All essential vital signs are available with all-in-one unit. Customer-made service is available for your requirement.

Features

- Touch Screen with 5.7" color TFT LCD display
- Dual Screen Output
- SpO₂, EKG and EtCO₂ Waveform on screen
- Parameter selectable: SpO₂, Pulse Rate, EKG, EtCO₂ Respiration, and temperature
- More compact size and easy to carry around with handle
- Trending on screen
- 200-hour memory capacity
- Real time display the physiological status
- Link with PC via USB port or Bluetooth for data analysis

Portable Multifunction Monitor

MD-800 II

Portable Multifunction Monitor

Description

MD-800 II is a desktop and portable selectable multifunction patient monitor with important vital signs of SpO₂, Pulse, NIBP and EKG, as well as waveforms of SpO₂ and EKG. Customer-made service is available for your requirement.

Features

- Touch Screen with 5.7" color TFT LCD display
- Dual Screen Output
- SpO₂ and EKG Waveform on screen
- Parameter selectable: SpO₂, Pulse Rate, EKG, EtCO₂ Respiration, and temperature
- More compact size with all essential functions
- Trending on screen
- 200-hour memory capacity
- Real time display the physiological status
- Link with PC via USB port or Bluetooth for data analysis

Portable Multifunction Monitor

MD-200

WBC Differential Cell Counter

Description

MD-200 offers an easier way to count and classify White Blood Cell. It is designed for addition, subtraction and conversation of the percentage for each item. Entering 12 figures ID number and date on report are available. Data saving and printout are possible via parallel port or RS-232 serial port. Working together with compatible software, it is possible to connect with a PC.

Features

- Count and classify White Blood Cell
- Be able to enter 12 figure ID numbers
- Link with PC via RS232 for data analysis

Differential Counter

MD-210

Telemetry Station

Description

MD-210 Telemetry Station is a monitor designed to obtain real-time data from one to eight MD-620P Smart *i*-Oximeters by synchronous wireless connection. It provides the optimal function for large data storage, alarm and long distance management while using more than one Smart *i*-Oximeter at nurse station in hospital and health care center application. It is able to analyze and statistic data with optional application software.

Features

- Wireless transmission
- Large data-storage memory
- Real time and long distance Monitoring

Refer to page 33 for accessories.

Telemetry Station

HD-7

Doc. Thermo Ear Thermometer

Description

HD-7 Doc Thermo is carefully designed for home care use to take an accurate, fast and one step ear temperature. It measures the infrared heat generated by the eardrum and surrounding tissues. The measurement result is displayed on LCD screen when a successful measurement is completed.

Features

- 1 second response time
- Measurement range: 34°C~ 42°C
- Unlimited usage time
- Celsius and Fahrenheit selectable
- Low battery indicator available

Refer to page 36 for accessories.

Doc. Thermo

HD-11

Doc. Thermo Ear Thermometer

Description

HD-11 Doc Thermo is carefully designed for professional use in hospitals or clinics to take an accurate, fast and one step ear temperature. It measures the infrared heat generated by the eardrum and surrounding tissues. The measurement result is displayed on LCD screen when a successful measurement is completed.

Features

Continuous scanning function
Measurement range: 20°C~ 50°C
Unlimited usage time
Celsius and Fahrenheit selectable
Low battery indicator available

Refer to page 36 for accessories.

HD-21

Doc. Thermo Ear Thermometer

Description

HD-21 Doc Thermo is carefully designed for home care use to take an accurate, fast and one step ear temperature. It measures the infrared heat generated by the eardrum and surrounding tissues. The measurement result is displayed on LCD screen when a successful measurement is completed.

Features

- 1 second response time
- Measurement range: 34°C~ 42°C
- Unlimited usage time
- Be able to read in the dark with backlight function
- Celsius and Fahrenheit selectable
- Low battery indicator available
- Foldable design with Ergonomics for easy use and storage

★ Color optional
Refer to page 36 for accessories.

Doc. Thermo

HD-420M

Blood Pressure Monitor

Description

HD-420M is a Blood Pressure Monitor and designed with FUZZY logic to accurately and comfortably measure the Systolic blood pressure, Diastolic blood pressure and pulse rate. It is also featured with memory recall at a maximum 64 sets memory records. Two optional measurement units of mmHg and KPa. are selectable. All functions can be performed with easy and simple steps.

Features

- Fast measurement by Fuzzy logic
- 64 sets memory size
- Compact and portable design
- Automatic air inflation and deflation mechanism
- User friendly operation interface

HD-360

HD-370

HD-420M

HD-200

Blood Pressure Monitor

Description

HD-200 is a Blood Pressure Monitor and designed with Fuzzy logic to measure the Systolic blood pressure, Diastolic blood pressure and pulse rate. It provides Memory function to store measurement records for further application (i.e. comparison) and the maximum 64 sets storage capacity. All functions can be performed with easy and simple steps.

Features

- Friendly measurement by one touch
- 64 sets memory capacity for comparison
- Large and clear LCD display for easy read
- Automatic air inflation and deflation mechanism

Refer to page 36 for accessories.

Blood Pressure Monitor

Smart Link I

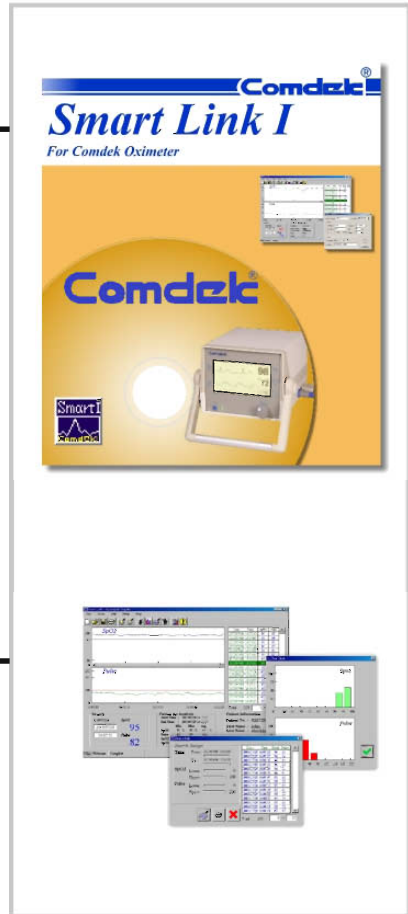

Software for Comdek Oximeters

Description

Smart Link I is a type of application software that converts saved SpO₂ and Pulse information of physical curves from Comdek Oximeter to individual computer through USB connection. Through a simple and easy-to-use interface, it provides users to view, search and print the saved information and results for the long-term monitoring and analysis purpose.

Features

- Diagnosis of Sleep Apnea and Disorders
- Analysis and management of patient data
- Statistics of the SpO₂/Pulse distribution
- Analysis of the physiological curves
- Connect with computer by USB

Smart Link V

Software for Comdek Capnography

Description

Smart Link V is a type of application software that converts saved EtCO₂, Respiration, SpO₂ and Pulse information of physical curves from Comdek Capnography to personal computer through USB connection. Through a simple and easy-to-use interface, it provides users to view, search and print the saved information and results for the long-term monitoring and analysis purpose.

Features

- Diagnosis of Sleep Apnea and Disorders
- Analysis and management of patient data
- Statistics of the EtCO₂, Respiration, SpO₂ and Pulse distribution
- Analysis of the physiological curves
- Connect with computer by USB

i-Smart Link

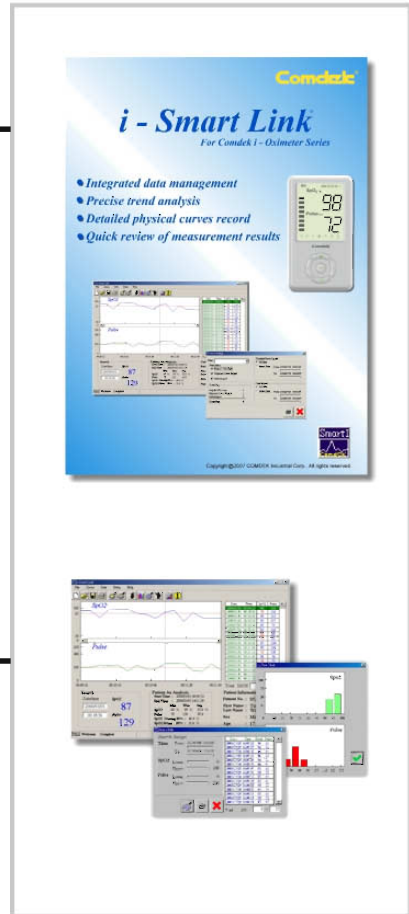

USB or Bluetooth Version

Description

i-Smart Link is a type of application software that converts saved SpO₂ and Pulse information of physical curves from MD-620P i-oximeter series to individual computer through USB or wireless connection. Through a simple and easy-to-use interface, it provides users to view, search and print the saved information and results for the long-term monitoring and analysis purpose.

Features

Diagnosis of Sleep Apnea and Disorders
Analysis and management of patient data
Statistics of the SpO₂/Pulse distribution
Analysis of the physiological curves
By wireless connection with computer or USB

Software for Comdek Oximeters

Sensors

Oximeter Sensors

Description

The entire lines of sensors are designed to be used accurately and reliably with COMDEK oximeter products.

The sensors provide the best fit and optimum performance.

These selections are available in both reusable and disposable types for neonate, infant, pediatric and adult application.

	Pediatric Probe Order No.: D001 10 pcs / pag.	Disposable	15~45 kg
	Neonate Probe Order No.: D002 10 pcs / pag.	Disposable	under 3 kg
	Infant Probe Order No.: D003 10 pcs / pag.	Disposable	3~15 kg
	Adult Probe Order No.: D001-A 10 pcs / pag.	Disposable	over 40 kg
	Pediatric Probe Order No.: R003 Finger Type	Reusable	15~40 kg
	Adult Probe Order No.: R004 Finger Type	Reusable	over 40 kg
	Infant Probe Order No.: R005	Reusable	3~15 kg
	Adult Probe Order No.: R008 Ear Type	Reusable	over 40 kg
	Roll Paper Order No.: MD-P20	Disposable For MD-630P	Length: 400 cm (158 inch)

Accessory
